## OR Visits Catalogue

# Committed with the medical education

For In2bones, it is important to offer surgeons the opportunity to share surgeon's experiences and techniques throughout their professional activity. That's why we decided to launch a medical training program in 2019. The main objective of this program, called «I2B Skills», is to connect surgeon's expertise with other healthcare professional, and to allow a better interaction between peers.

## I2B SKILLS LAB

is a program developed by In2Bones to train theoretical and practical through our products and associated techniques.

Our Skills training programs have demonstrated a 90% lead to customer conversion rate.

## I2B SKILLS OR VISIT

is an open door to surgeons interact and exchange with peers and see live surgeries in order to study unique cases and see techniques and benefits of In2Bones products thanks to the surgeon host experience.
